

Using Photoshop or Photoshop Elements To Prepare Images for Electronic Submission

The ImageComp Pro, our competition software, requires that the width of an image not exceed 1024 pixels; the height not exceed 768 pixels. One of the dimensions may be smaller than the maximum stated but the other should be either 1024 or 768. If your image is much smaller than these dimensions, it will be projected on the screen about postage stamp size. The resolution is limited to 72 pixels per inch.

After you have edited your image in Adobe Photoshop or Elements, go under the Image Menu and select Image Size.

1. Go to the Document Size Section of the dialogue box and set the Resolution to 72 pixels/inch.
2. In the Pixel Dimensions Section, set the Width to no more than 1024 pixels if you have a landscape shaped (wider than tall) image. If a portrait shaped (taller than wide) image, set the Height to no more than 768 pixels. You only need to set one of these dimensions. The program will fill-in the other so long as there is a check mark in Constrain Proportions box. Before you leave this step, ensure that the height dimension does not exceed 768 pixels and the width dimension does not exceed 1024 pixels. If it does, reset the dimension that is in excess of the maximum. Occasionally, an image may not be exactly 1024 x 768 because of a previous cropping or the original image size.

3. Press OK.

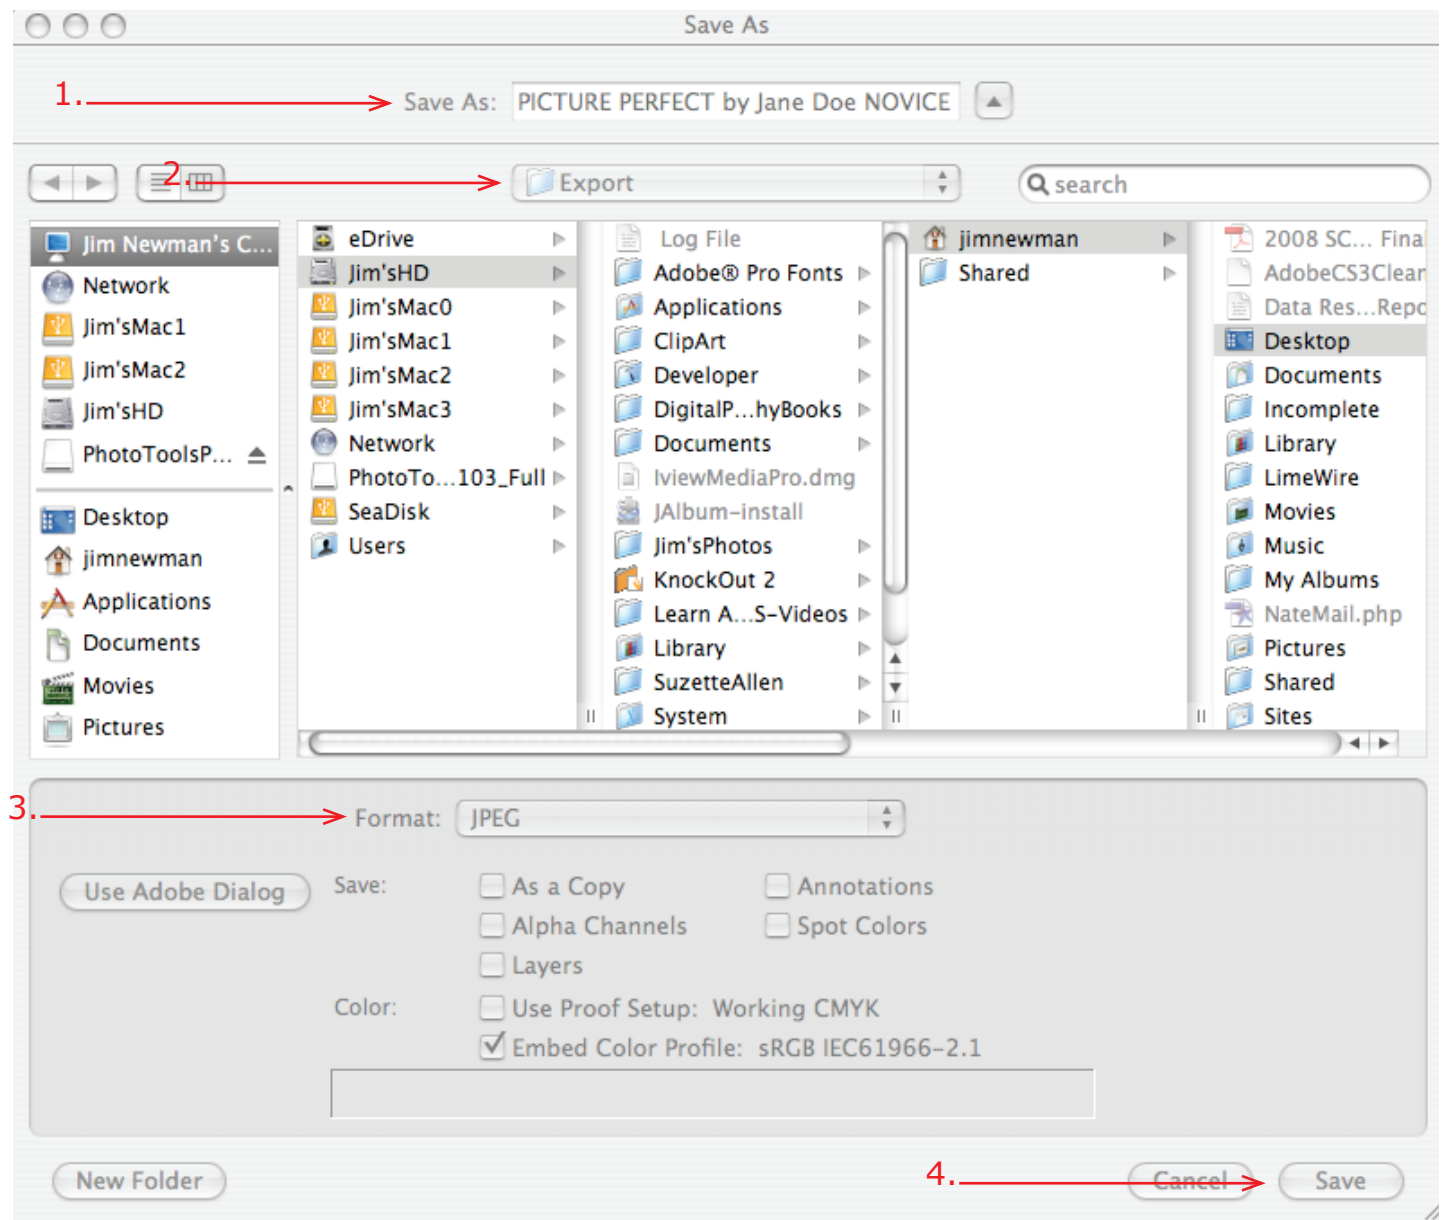

Notification: If you have not received an e-mail from the committee to acknowledge receipt of your image within 48 hours, contact Sandy Dimke at 846-9580 or 263-4340 or by e-mail to <dimke@hargray.com>.

ImageComp Pro has a naming convention that must be used for the program to accept an image. The image file must be named as the directions below. It is not enough to include the name in the e-mail message which accompanies the file. The image file itself MUST be named as specified by the directions below. Here is an example: IMAGE TITLE by Photographer Name SKILL LEVEL CLUB NAME. Please pay particular attention to UPPER and lower case characters and spacing. The format of your file name should be just like the example.

Under the File menu select Save As and...

1. Name your image like this sample: PICTURE PERFECT by Jane Doe NOVICE PCOB.jpg
2. Select or create a folder in which to save the file.
3. Save the file as a .JPEG
4. Press the Save button.

Go to the designated folder and check the image.
E-mail image to: <dimke@hargray.com>.
